Question 6.3

Define measurable usability requirements for the new site. Give a short justification of your

choices. (Don't try to redesign it. Just state the usability requirements.)

Site is **fapl.ru ,** it's a football league forum. Requirements for this are:

1) It must be light and open fastly.

2) It must be comfortable to read news.

3) It must be mobile view adapdated.

4) Writing comments must be comfortable

5) Subjective must by satisfying

6) Understandability of navigation

Question 6.4

Carry out a usability test Choose a Web site (preferably the

one you have chosen in Question 6.3) and carry out a

simple usability test of it. Follow the plan in lecture 6. Be

careful when defining the test tasks and choosing the

test users. Carry out the test with one user or preferably

two.

 Tests: Opinion poll

Questionnaire	agree	neutral	disagree
It was easy to use site	Tester 1	Tester 2	
It was easy to write comments			Tester 1 Tester 2
It was easy to read news	Tester 1 Tester 2		
It was easy to learn information		Tester 1 Tester 2	

 Test: Measure for understanding

Ask 2 testers to ask what means error mesages "You have to login first, Comment can't be deleted".

Result: both two testers gave right answers.

Test: Keystroke counts

Ask 2 testers to open first article at second page and write comment.

Result: Average total time 38sec.

B) Profiles of test users:

1) School girl, age 17 active social networks user.

2)Student, age 20, web developer.

C)We found that we have adapt site to mobile view and make process of writing comments easier.

D)It's medium difficult to use site.
